

ROBUR continues to expand its services for electromobility:  
Founding of ROBUR ELMOBIS

Munich, 06.07.2021

**On 01 July 2021, Munich-based ROBUR Industry Service Group founded ROBUR ELMOBIS GmbH, thus strengthening its commitment in the field of charging infrastructure solutions.**

Since its foundation in 2015, ROBUR stands for modern, high-quality industrial services and for solutions to the challenges associated with digital transformation and ecological change. The Group already generates more than 50% of its turnover with sustainable services and is continuously expanding this area.

More than 1,500 of ROBUR's 3,000 colleagues worldwide work on projects in the renewable energy market, from planning and installation to service and maintenance. The Group's specialists offer solutions and bundled expertise "from a single source" and are holistic partners for customers along the lifecycle of their systems.

ELMOBIS will bundle and further expand all activities and expertise related to electromobility. A powerful team of specialists with knowledge gained over 10 years and experience of approx. 25,000 installed charging stations will ensure project success for its customers and focus on the installation, maintenance and service of the charging infrastructure.

"This development is the logical continuation of the first successful projects in the charging station infrastructure and e-mobility sector in various companies of the Group. We want to grow in this area over the next few years and become one of the major players in the installation and service business", explains Jan-Jörg Müller-Seiler, CEO and Managing Partner of ROBUR.

"We are pleased to be a part of ROBUR with the founding of ELMOBIS and to take the lead in advancing the electromobility sector in the Group. The expertise already available at ROBUR is quite impressive. This will be of great help to us in further expanding our portfolio for turnkey construction. We are fully motivated to advance the topic of electromobility forward together with our other colleagues at ROBUR", says Olaf Becker, Managing Director of ROBUR ELMOBIS GmbH.

**About ROBUR Industry Service Group GmbH (ROBUR):**

Founded in 2015 in response to the ecological change of industries and the changing challenges of high-quality and increasingly digital industrial services, ROBUR now ranks among the top 10 industrial service providers in Germany with sales of approx. EUR 200 million in 2020 and an established global presence.

Both the financing and the leadership of the group are characterized by partnership and entrepreneurialism. Our member companies benefit from the size and internationality of the group and can leverage sales, capacity utilization and management synergies.

About 3,000 colleagues globally work in the wind, water, energy, industrials and process industries. As expert partners for our customers, we create holistic solutions from the planning and realization to maintenance and operation, to the relocation and decommissioning and support our customers with digital, automation and data-insights solutions in shaping their digital transformation.

The challenges of ecological change are our drive for creating efficient, optimized and holistic solutions for the benefit of our customers, the environment and the future generations.
